

Christiane, heartfelt congratulations and thanks to all of you who have persevered to bring light and transparency to our Society! Through these courageous actions you have in fact begun a process of transformation of the clouded history of secrecy, censorship and top-down fiat that has dogged so many anthroposophical institutions for decades. As Society members we must fully own our history, be prepared to make full amends to those we have harmed, and develop a true circle of spiritual science where leaders only represent heart apprehensions from the periphery. The future comes from behind us, drawn by the suctional space of a longing for truth. Please share these thanks with all those who courageously carried this forward.

Hugh Williams
